

Health, Safety, Environment (HSE) Policy

Management in Techno Dive takes full responsibility that our HSE and Quality system is fully operational and up to date.

We encourage our clients to audit us – only through cooperation and teamwork can we improve the business best practices.

- We shall instill trust and confidence among our customers and our employees.
- Zero injuries are our overall objective.
- We shall follow acts and regulations.
- HSE is the most important internal work area.
- No operation has priority over safety.
- HSE is a line responsibility in the entire organization.
- Everyone is responsible for own and other's safety.

We will achieve this through continuous improvement of all processes and systems.
Our yearly goals are defined in "Yearly HES action plan".

Husøy, 12.06.2018

A handwritten signature in blue ink, appearing to read "Bjørn Utseth", is written over a horizontal line.
